---

## Daliy Work

- \* Hired as a "Senior Electronic Engineer". Work in both hardware and software.
- \* Meet with mechanical engineer, discuss what we need.
- \* Write specifications for what we proposed.
- \* To lead our electronics team to discuss with Mechanical team to approve proposal.
- \* Draw schematic.
- \* Layout PCB.
- \* Send out the order to assemble PCB.
- \* Debug PCB hardware by multimeter, oscilloscope, logic analyzer, electronics load, and high/low Temperature Aging Environmental Test Chamber.
- \* Write codes for FPGA/MCU/CPU. Debug them.
- \* Meet with mechanical engineer, review progress.
- \* Train the trainees.
- \* Give advice to solve the problems from my coworkers.
- \* Set the next-gen product research as a long term task.

## Why open

- \* Nuclear industry belongs to high tech. But it is limited/narrow.
- \* I prefer to enter medic or vehicle industry/market.

## Work permit

- \* I use an asylum EAD card as my work permit.
- \* Click on the top right of this PDF it will guid to What EAD card is.
- \* No extra sponsorship is needed.
